

Key Features of PBA

One System	>	One single data input, one source of truth. Goodbye to spreadsheets and different badly integrated systems
People Centric	>	Human resources are the core of your project-based business. Let them make the difference with the right resource planning tool and an optimized UX
Mobility	>	Team members work and collaborate from anywhere at any time. Give them flexible access to all project details
Outsourcing	>	Manage and monitor external resources, evaluate suppliers and outsource contracts
Financial Health	>	Effectively manage cash flow to meet short-term operating costs and debt obligations, keep track of economic and financial data
Project Uniqueness	>	Asses the potential of new projects through a feasibility study defining in detail its expected costs and projected benefits
Change Requests	>	Get visibility on and manage change requests, create a quotation and automatically add milestones to existing projects
Employee Self Service	>	Interact with employees and make it easy for them to register hours, apply for leave or request reimbursements.
Quick Invoicing	>	Easily capture information from all projects and prepare a “to be invoiced” list. Set up the authorization workflow
Project Performance	>	Efficiently track all project costs and revenues, compare forecasted and actual margins
Real-time Insights	>	Get real-time actionable insights in economic and financial results. Take data driven decisions
Integration	>	Easily integrate the application with existing ERP and CRM systems
